

DOE O 420.2A

"Safety of Accelerator Facilities"

Performance Based Contracts: Order Review Panel Decision On Team Report Recommendations

The Panel has reviewed the subject report and has disposed of the recommendation contained therein as follows.

We concur in the team report recommendation, which is to retain the CRD of the Order. Additionally, you are to revise the Applicability paragraph of the Order where it addresses contractors, conforming it to the format required by the current version of the DOE Order on the Directives System. You are to restrict applicability to major facility management contractors involved in accelerator operations.
